DETAILED ACTION

Applicant's election without traverse of claims 65-67 in the reply filed on 10/31/2006 is acknowledged. Claims 1-64 have been cancelled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 65-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Lange (USPAP 20020099640) ("Lange").

Re claims 65 and 67: Lange teaches a method and machine readable medium for creating and trading a group of at least first and second related financial product, comprising: identifying an interest rate, said interest rate having a first value corresponding to the interest rate at a first time (sections 0028, 0041, 0578); identifying an expiry and a payout (sections 0037, 0038); identifying a first premium to be paid by a buyer of the first financial product when the first financial product is issued (sections 0042, 0713); selecting a first value change in the interest rate, wherein the first value change comprises an absolute change in value of the interest rate and a direction of change in the value of the interest rate; wherein said financial product is worth the payout amount to a buyer of the first financial product if, between the first time and expiry, the value of the interest rate meets a first strike rate, wherein the first strike rate is a sum of the first

value and the first value change; and wherein said first financial product is worth nothing to the buyer if, between the first time and expiry, the value of the interest rate fails to meet the first strike rate (sections 0037, 0038, 0041-0043); identifying a second premium to be paid by a buyer of the second financial product when the second financial product is issued (sections 0042, 0713); selecting a second value change in the interest rate, wherein the second value change is different from the first value change, and the second value change comprises an absolute change in value of the interest rate and a direction of change in the value of the interest rate; wherein said financial product is worth the payout amount to a buyer of the second financial product if, between the first time and expiry, the value of the interest rate meets a second strike rate, wherein the second strike rate is a sum of the first value and the second value change; and wherein said second financial product is worth nothing to the buyer if, between the first time and expiry, the value of the interest rate fails to meet the second strike rate (sections 0037, 0038, 0041-0043); and providing a common electronic platform for trading each of the related financial products in the group (Abstract).

Re claim 66: Lange teaches the step wherein said financial product is offered on a trading exchange, and may be accepted by another participant in the trading exchange (Abstract, sections 0054-0055).

Examiner's Note: Examiner has cited particular portions of the reference(s) as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the

individual claim, other passages and figures may apply as well. It is respectfully requested that the applicant, in preparing the responses, fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
